SMART PROJECT MANAGEMENT & EFFICIENT ACCOUNTING WITH CLOUD-BASED SAP®

" SAP Business ByDesign® is an innovative solution that optimizes our processes and makes our data transparent. We chose itelligence* as a partner because they're on the same wavelength as us

Marc Arn, CEO, inpeek AG

Challenges

- Project management, time recording and billing were time consuming and error prone
- Microsoft Excel and Word were the only information technology

Solution

- SAP Business ByDesign, a complete, cloud-based ERP solution

Benefits

- Anywhere, anytime mobile access
- Cloud-based solution with a known monthly cost
- No in-house IT infrastructure required
- Integrated analysis and reporting tools for total transparency
- End-to-end processes with no manual data input

Why NTT DATA Business Solutions?

- Long-term relationship as an SAP partner
- Experience of implementing SAP Cloud solutions and own use of SAP Cloud for Customer

* Since April 1, 2021 itelligence is operating as NTT DATA Business Solutions

4 months for implementation

Replaced Manual Processes

Which SAP self-service solutions meet the client's needs? That is the question inpeek AG has to answer during every project. The Zurich- and Bern-based consultancy helps customers to implement the SAP technology that's right for them. In order to manage projects more effi ciently inpeek set up its own integrated in-house SAP solution. "Our focus was on project management and fi nance," says inpeek AG CEO Marc Arn. "In particular, we wanted to automate our manual time recording and billing processes."

Fast Cloud-Based Implementation

inpeek decided to use SAP Business ByDesign, a cloud solution that is quick and easy to implement and is operated from a secure SAP data center. "We simply use the solution online," Marc Arn explains. "The monthly rental gives us full cost transparency and lets us access data from mobile devices, anytime and anywhere."

inpeek chose NTT DATA Business Solutions AG to implement the software because NTT DATA Business Solutions had the know-how to optimally meet all of the project requirements:

Project management, time recording and billing had to be automated, rather than performed manually with Microsoft Excel or Word. The hours worked on a project should be automatically booked to the client. The ongoing variance analysis was required to ensure that projects were on time and on budget. The customers should be billed at regular intervals for the work done.

Real-Time Reporting of Services Provided

The NTT DATA Business Solutions team tailored the solution to inpeek's business processes, provided training for key users and carried out application testing. The system went live just four months later.

inpeek staff can now complete project timesheets in real time by accessing the cloud-based solution from smartphones and tablets. Its analysis and reporting functions ensure that the latest figures are always available. The integrated financial accounting solution has also saved inpeek a lot of money: expense vouchers are now booked automatically in-house, and creditors are immediately recorded in SAP Business ByDesign. This means that numbers can be transferred straight to the annual accounts in preparation for year-end closing without outside assistance.

"We're still planning to introduce the integrated CRM module," Marc Arn says. "That will give us a 360-degree view of all our clients, so we can provide them with even better project support."

> **We've signifi cantly reduced the amount of time and effort we spend on recording work carried out.**
