- Landscape receives the best maintenance and is reliably available at any time.
- This includes real-time insights into sales, production, inventory, and other key metrics, giving companies the visibility, they n

Challenges

A company that has been established for almost 43 years.

PT Dharma Satya Nusantara (DSN) Tbk was established on September 29, 1980. DSN Group is a group company that has several SBUs, the biggest one is palm oil, the second one is wood products and the third one is new business, and for this partnership NTT DATA Business Solutions will focus on their wood products.

They have a monthly production of 12,000 or annually around 136,000 per year with plus or minus working days every month. This implementation will be the first on timber industry.

Solutions

Pioneer for the SAP implementation on timber industry

Pioneer for the SAP implementation on timber industry
The timber industry, like many other industries, is in need of technology to help streamline processes, improve efficiency, and drive growth.

" This is one of our challenges in the future that the wood industry in the future should not be labor intensive, it must be with technology with a good program, one of which is with SAP and maybe DSN is one of the pioneers in the wood industry using SAP. "- Rinarso Hadi Prasetyo, Director.

SAP S/4 HANA integrates seamlessly with other systems and applications, helping to automate workflows and reduce manual errors. By leveraging technology like SAP S/4 HANA, the timber industry can gain a competitive edge and drive success in today's fast-paced business environment.

Benefits

Accelerate Decision-Making with SAP S/4 HANA: Make the Right Moves, Faster

DSN is very satisfied working with the NTT DATA Business Solutions. The NTT DATA Business Solutions team has a deep understanding of DSN's wants and needs, making them a trusted and reliable partner. The project was delivered in accordance with the timeline, meeting DSN's expectations and delivering results that exceeded their goals.

"We have worked with several consultants in the past and this time with NTT DATA Business Solutions, I think we are very satisfied with NTT DATA Business Solutions, the teams very supportive and the project road is also not delayed, and I see the details in presenting the parameters that must be met in this SAP." - Rinarso Hadi Prasetyo, Director.
