

it.lifesciences - Our Expertise for the Life Science Industry

Optimize Your Process Results and Comply with International Laws and Regulations

it.lifesciences is an extremely stable platform that forms the foundation for the further growth and development of your organization.

it.lifesciences supports your specific life sciences needs

The Right Formula for Your Pharmaceutical Challenges

Complying with Challenging Requirements

The pharmaceutical industry is constantly evolving. The need for efficiency improvements is increasing in this competitive market. At the same time, increasingly strict regulations result in a call for a more transparent work method. How do you deal with this complexity and the challenges that are unique to the pharmaceutical industry?

Focus on Life Sciences

it.lifesciences is based on SAP S/4HANA software and covers all standard financial, commercial, manufacturing and logistical processes without any problems. The standard functionality is complemented by industry-specific processes. These are intended for finance, purchasing, planning, and production. But also for plant maintenance, sales, management and quality control of the total chain.

Achieving High Quality Levels with Less Effort

it.lifesciences as a template is based on industry specific best practices. This preconfigured SAP system is based on more than 25 years of experience and in-depth knowledge of the industry. It provides support for all processes relating to life sciences and includes a sample company that enables you to quickly replicate processes.

In addition, a powerful project method has been developed, including documentation that is based on GAMP5.

Compliance and validation are crucial for a successful ERP implementation.

The advantage of it.lifesciences is that you don't have to reinvent the wheel and will start to save costs immediately.

100%
compliance
with all legal
requirements

We Offer Everything You Need for the Success of Your Business

Intelligence supports you with an integrated business solution based on SAP S/4HANA that offers important industrial and advanced technological capabilities, including:

Compliance

- Compliance with all legal requirements such as FDA (CFR21part11), DSCSA, GxP, REACH, IDMP, etc.
- CAPA (corrective and preventive action) and supplier audits
- Project methodology and documentation (Standardized Process Model, URS, Test Scripts, etc.) in support of a validated ERP implementation

Research & Development

- Formula management for product development and production
- Product development process, including sampling, controlling, and project management

Production

- Simple and efficient sales and production-planning that effectively responds to changing needs
- Production cockpit with weighing and dangerous goods integration

Quality control

- Integrated quality management with comprehensive LIMS functionality
- Automated printing of quality certificates
- Calibration
- Stability studies
- Extensive Batch Management
- Cold Chain Management

Supply Chain Management

- Stock management and planning up to packaging level
- Labelling including required pharmaceutical coding
- Real-time insights into the process, from receipt of goods to final product release
- Track & Trace of Batches and Serialized items throughout the chain

300+

industry processes

**Ready to Support Your Business and
SAP Investment Worldwide**

it.lifesciences allows you to start small, with rapid deployment of SAP core functionalities and a system that evolves with the future needs of your organization, or even lets you manage global, full scope implementations. SAP also provides the platform to integrate the latest technologies into your process such as IoT, Blockchain, Artificial Intelligence, Machine Learning, and more.

Whether your future IT landscape will be on-premise, cloud, or a combination of both, itelligence has global expertise and offers a choice in services and deployment options - including hosting and application management services. We implement our projects Fixed Price, Fixed Scope and Fixed time, depending on your process scope and system landscape.

With more than 25 years of experience in the pharmaceutical industry, we offer proven knowledge and an integrated solution that gives you real-time insight into your processes and enables you to turn opportunities into hard business results.

The solution can be purchased and fully implemented within 9-12 months.

 **Fixed Price, Fixed Scope,
Fixed Time**
