

PICK AND CHOOSE THE FUTURE – INTELLIGENT CLOUD BASED SCANNING IN THE WAREHOUSE

The it.cloudscan solution not only simplifies our warehouse processes, it also enables us to avoid incorrect bookings to increase the data quality in our SAP S/4HANA Cloud system.

Dean Lindsey, Senior IT Manager Europe,
Life Sciences & Environment as part of MANN+HUMMEL

Challenges

- Lack of automation and integration of warehouse management with ERP systems
- Poor User Experience with paper driven picking
- Poor Data Quality and slow processing time

Solutions

- it.cloudscan – mobile scanning solution
 - User friendly preconfigured mobile Android solution
 - Based on SAP API whitelisted Services
 - Standard integration into SAP processes

Benefits

- Multiplied with many locations, warehouse management logistics is offering a great potential for optimization
- Simple recording of goods movements with it.cloudscan
- Improved control capabilities thanks to real-time data
- SAP user authorizations & Cloud based logging
- Flexible configuration & easy branding option
- Cloud readiness & fast adoption of innovations
- Multilanguage support & guided onboarding

Why NTT DATA Business Solutions?

- Qualified SAP partner with in-depth understanding of the industry
- High expertise in the cloud environment
- Experienced IT development team
- International availability and support of the solution
