

TOYOTA TSUSHO

TOYOTA TSUSHO OPTIMIZED ITS PROCESSES AT GLOBAL SCALE

Challenges

- Traceability of logistics processes in real time.
- Creation of a flexible system for strategic growth plan in future.
- The need to create a flawless supply chain process which meets customer, supplier and production needs.
- Optimization of cost and operations in general.

Benefits

- SAP S/4HANA's logistic and supply chain best practices are in the scope of project. All logistic and warehouse processes are optimized with EWM, and master data management is centralized within the project.
- Enabled real time tracking of logistic operations and real time reporting of cost and profit.
- Toyota established this project as a global template and benefitted from this template for all EU locations.
