# MOVE AND MODERNISE SAP ON MICROSOFT AZURE

## NTT DATA Business Solutions and Microsoft Azure

More and more organisations are moving their SAP landscape to the public cloud in order to gain greater agility and business value for their mission critical applications. NTT DATA Business Solutions and Microsoft have extended their strategic partnership to support businesses by deploying an agile and cost efficient Azure platform with NTT DATA's planning, migration and managed cloud services.

With a focus on accelerating our customer's digital transformation, the alliance brings together NTT DATA Business Solutions Global SAP S/4HANA Move Services with Microsoft's trusted cloud platform Azure. Not limited to the S/4HANA Move Services, our alliance also offers early cloud computing adoption options for businesses running on SAP ECC and considering a move to Microsoft Azure before moving to SAP S/4HANA.

## FUTURE-PROOF YOUR BUSINESS

The majority of SAP customers we speak to are either contemplating or actively planning for their move to the SAP S/4HANA in the cloud in order to achieve the following;

- To embark on a journey of digital transformation
- To consider attractive new software licensing options with a 'RISE with SAP' subscription based Software-as-a-Service (SaaS) model
- To remove the complexity and high maintenance from their current on-premise SAP landscape
- To build agile IT foundations for continuous innovation and faster time to market
- To adapt to fundamental changes in working conditions in response to the recent global crisis

# MOVE TO SAP S/4HANA® ON MICROSOFT AZURE

With our market leading SAP consulting and advisory skills, we provide seamless cloud managed services for SAP customers. Based on our 30+ years' experience of delivering SAP solutions to a number of industries, we have developed an SAP S/4HANA Factory Conversion that enables our customers to move to SAP S/4HANA in the most efficient, low risk and modern way. We combine our SAP S/4HANA Conversion Factory with the Microsoft Azure cloud infrastructure to offer high availability, compliance with the latest industry regulations and a proven route to the "SAP Intelligent Enterprise."

We also offer an SAP on Azure Conversion Proof of Concept (PoC) for businesses considering moving their existing SAP ERP to Microsoft Azure before moving to the next generation intelligent enterprise suite, SAP S/4HANA. Within our SAP on Azure Conversion PoC, we offer hybrid cloud computing options on Microsoft Azure tailored to our customer's business needs. Our SAP on Azure Conversion PoC is a perfect fit for a business running an on-premise SAP ERP system or privately hosting their SAP ERP. The PoC provides an ideal opportunity to learn everything about running your SAP ERP on Azure in preparation for further productive use. Our customers benefit from all the basic functionality for test purposes and will be able to understand the procedure and resources required. The objective is to provide a fast and easy deployment with minimum disruption to the business and minimum conversion effort.

**Migrating our data to Microsoft Azure with our trusted partner NTT DATA Business Solutions has given us complete control of our data.**

Patrick Esser, Head of IT, Transversal Competence Centers at ArcelorMittal Europe

## YOUR BENEFITS

- De-risk the journey to the cloud with a proven SAP on Microsoft Azure Conversion PoC
- Fast and easy system transition to Microsoft Azure to quickly gain the infrastructure for running next-generation SAP Solutions
- Most activities are performed remotely and based on our standard factory conversion approach to allow us to offer competitive pricing
- Simplified disaster recovery architecture and a transparent process

## MANAGED CLOUD SERVICES FOR SAP

Leveraging our global strategic partnership with Microsoft, we are also a Gold Microsoft and SAP on Azure Advanced Specialisation Partner. We provide our customers with solutions for planning, migrating, managing, and optimising SAP workloads on Microsoft Azure.

We are a one-stop-shop for our customers looking to source SAP expertise and Microsoft Azure support for provisioning, combined with a billing experience from a single provider for added simplicity. We make our customers life even easier with flexible pay-as-you-go business models.

With our SAP Managed Cloud Services, your business gets equipped with the most efficient cloud infrastructure needed to transform your SAP centred business, making it ready for the future. We cover all the aspects of your cloud transformation, from analysing your business objectives and growth strategy to migrating your data and managing your cloud with our full spectrum of digital, analytics, and enterprise cloud services.

The SAP on Microsoft Azure advanced specialisation highlights the partners who can be viewed as most capable when it comes to migrating enterprise SAP applications over to Azure. NTT DATA Business Solutions clearly demonstrated that they have both the skills and the experience to offer clients a comprehensive and professional SAP to cloud managed service.

Rodney Clark, Corporate VP, Global Partner Solutions,  
Channel Sales and Channel Chief at Microsoft

## WHY NTT DATA BUSINESS SOLUTIONS?

- Experience of moving customers to SAP S/4HANA with 480 delivered SAP S/4HANA projects and 90+ successful SAP S/4HANA conversions
- 5,900 SAP S/4HANA skilled consultants across the NTT Group
- A proven low-risk SAP S/4HANA Conversion package (SAP Qualified Partner Packaged Solution)
- We are a trusted Advisor to the SAP Community. A Global SAP partner with many years' experience of IT Platform Transformation. We run our own modern data centres as well as our strategic partnership with Microsoft so are ideally placed to advise our customers
- The skills and experience to plan, move and manage your SAP landscape.
  - Plan: We develop a strategy to migrate your business to the cloud
  - Move: Our proven methods and processes deliver a cloud strategy that fits our customer's vision
  - Manage: Our cloud management services harmonise the cloud landscape to remove the complexity and provide both secure and flexible cloud services

Based on excellent planning and delivery, this was actually the least stressful project that I have ever been involved in. Our management team were naturally nervous given the business criticality of the systems being migrated, so it was important to present the secure capabilities of a world class data centre and the skills of our SAP Partner. Running a project of this magnitude was achievable with the support of NTT DATA Business Solutions who helped with the smooth transition to the cloud.

Jamie Adams, Chief Information Officer, Scapa Plc

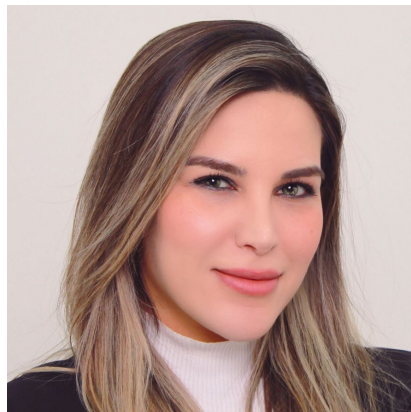

## We Transform. SAP® Solutions into Value

Digital transformation helps companies reach their full potential - if the underlying technologies work for the people using them! At NTT DATA Business Solutions, we design, implement, manage and continuously enhance SAP solutions to make them work for companies – and for their people.

With operations in more than 30 countries, we have enabled thousands of companies to become more efficient and effective during the last three decades. Our 12,000 experts around the world will also accompany you on your journey toward a truly intelligent enterprise – wherever you want to start!
