

- **Industry :** Plastics and Packaging
- **Number of Employees:** 2,700
- **Head Office :** Istanbul

Having started metal packaging production in 1972 at its factory in Çorlu, Sarten offers products to various industries such as canned food, cooking oil, aerosols, pesticides, lubricants, and paint with its 12 factories.

Solution :

- SAP ERP
- SAP BI
- SAP HCM

Highlights:

- Product structure, configured specifically for plastic and metal packaging industries, has been designed and implemented end-to-end in 15 production facilities.
- By building an effective reporting and control mechanism, management, fiscal, financial and administrative affairs of the companies within the scope of the project have started to operate simultaneously.

Project Term: 1 year

Benefits:

- An effective reporting and control mechanism has been established for all operations.
- Overall work efficiency and quality has been increased while current workload is reduced.
- Customer expectations are met in a more efficient way.
- Company personnel can use the program efficiently.
- Speed and efficiency have been gained in financial processes.
- Current workload has been reduced.
- All processes have become more measurable and controllable.
