

SILVERLINE

- **Industry** : Electronics and High-Tech
- **Number of Employees** : 1400
- **Headquarters** : Istanbul

Silverline has started its operations in 1994 as a part Silver Group. Today Silverline became a leader brand in the built-in kitchen appliances industry.

Applied Solutions:

- SAP ERP,BW,BO

Project Highlights:

- Production Planning, Material Management, Accounting and Finance, Asset Accounting, Quality Management, Engineering Change Management, Sales and Distribution modules were implemented within the project.
- B2B application was integrated to the SAP system.
- Besides SAP ERP solution, BusinessObjects-Business Warehouse-Business Intelligence solutions, covering 17 different reports, were applied.
- Management processes of Silverline consolidated and 6 subcompanies were integrated to the SAP ERP system of Silverline.

Benefits:

- Running business processes became more efficient.
- Electronic banking operations were integrated to the system by SAP ERP.
- Existing portals were integrated to the SAP.
- In addition to Sales and Distribution, Production Planning, Cost and Profitability Analysis' were put into practise.
- By putting RF applications into practise concurrently, production confirmations were started to be done via touch screens.
- Monitoring analytical reporting at management level was widely spreaded with BusinessObjects and Business Warehouse solutions.
