aws

> **❚❚** itelligence can guide your business through its entire cloud journey. Our specialists have a wealth of experience in cloud projects for customers around the world from various industries. itelligence has won numerous SAP Cloud Partner awards and has over ten years of experience in cloud computing.

How Your Public Cloud Service Provider Strategically Facilitates Your Digital Transformation

We Manage Your Cloud

Managed Services for New Business Models

Managed services are gaining popularity for businesses looking to reduce complexity and free up internal resources. In today's market, there is a lot of pressure on IT departments to innovate and become an integral part of business-driving operations. To do so, CIOs must concentrate on eliminating laborious tasks and giving their teams more time for innovation.

Public Cloud Services with itelligence

Our global portfolio helps businesses operate with added flexibility. From advisory to hosting, application management to delivery services, our services can aid all areas of your organization. Managed by itelligence, public cloud services complement our SAP basis, database, and system administration services for SAP® applications. Our integrated service and virtual data center management enables easier support of business processes and provides a clearer overview of data exchange. With our public cloud services, you can quickly adopt innovations to new business requirements.

Supporting Your SAP Applications

itelligence offers complete hosting of SAP application system landscapes, including development, quality assurance, and production systems based on individually designed and certified private and public cloud infrastructure. Our experts manage your cloud and help you ensure uninterrupted IT operations through implementing ERP and CRM or cloud solutions from the SAP S/4HANA® suite. Our services include provisioning for all application layers, SAP application servers, and additional system components such as gateways, Adobe Document Services, and SAP Fiori® front-end apps.

itelligence has

30 years

of experience and extensive knowledge of SAP applications and cloud implementations.

Achieve Efficiency Gains

itelligence leverages cloud platforms with Amazon Web Services to support businesses with more flexibility. Test and development systems that are not used all the time are particularly suitable for public cloud and can lead to savings of up to 50%. And even production and disaster recovery environments benefit through rapid provisioning in minutes instead of days. Additionally, optimized storage resources fulfill backup and archiving requirements.

Infrastructure as a Service

Cloud computing is a strategic part of business development in the digital age. itelligence can help in laying the foundations for the future by harmonizing private and public cloud structures with your existing applications. What's more, with a single partner to monitor and maintain your system landscapes, you are future-proofing your cloud infrastructure.
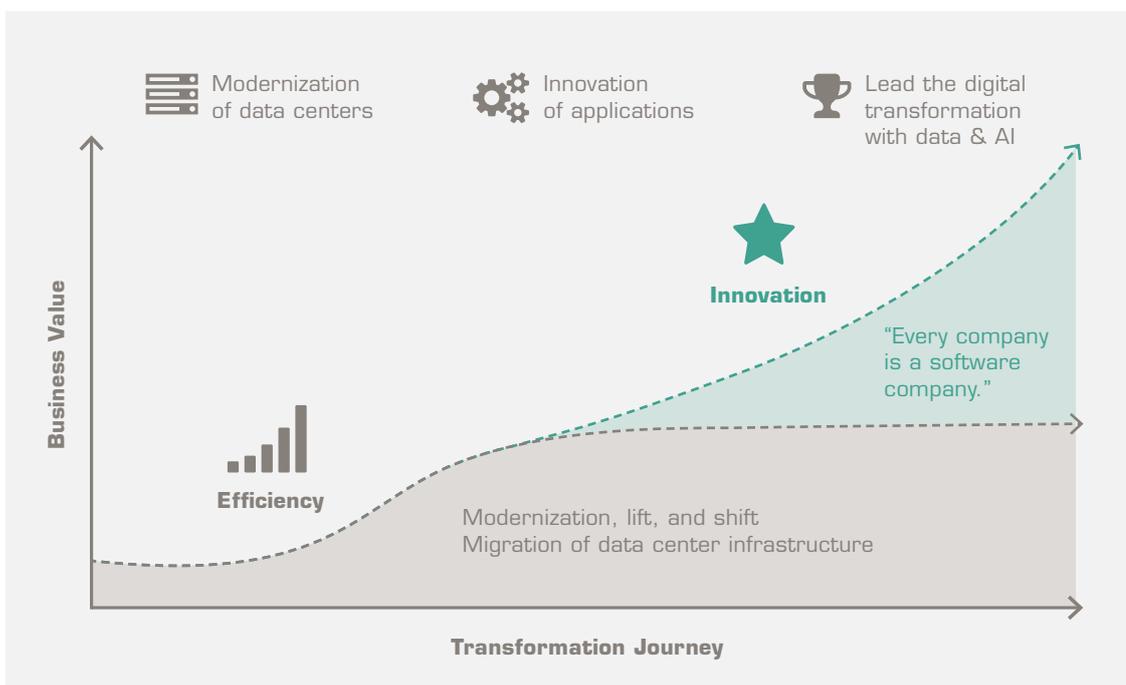

Safe and Secure Cloud Operations

It is important to assess your specific data protection requirements and the security measures offered by your cloud provider. itelligence can advise you on advanced backup, failover, and recovery and provide you with information on data protection policies and certifications.

Why Choose itelligence as Your Cloud Partner?

- Experienced: 30 years of experience and extensive knowledge of SAP applications and cloud implementations
- Affordable: pay-per-use price model available for all infrastructure services
- Flexible: scalable packages for you to choose options according to your specific needs
- Expandable: additional data centers and hosting options available with Amazon Web Services
- Reliable: high availability service level agreements, including disaster recovery options

❚❚ When digitizing their business, SAP customers seek ways to access critical data easily and reliably. Our focus lies in optimizing business applications from the cloud to the customer.

Norbert Rotter, CEO, itelligence AG & NTT Data Business Solutions

itelligence and Amazon Web Services

With the rapid expansion of cloud services and complex IT infrastructures, it is essential to have the right managed services partner at your side. As an Advanced Consulting Partner for Amazon Web Services with SAP expertise, we offer a wide range of services for the public cloud – from consulting and strategy services, to implementation and support of SAP solutions.

We deliver comprehensive global IT and business services, with the flexibility and cost-efficiency of SAP-related public and hybrid cloud technology.

The joint itelligence and AWS solutions include complete migrations of SAP S/4HANA and other SAP solutions to AWS and fully managed services by itelligence on AWS. As a starting point and for special scenarios, proofs of concepts on any SAP solution with AWS services are available. AWS therefore provides a global and reliable IT infrastructure for any company.
