STREAMLINE AND OPTIMIZE MANAGEMENT OF YOUR RENTAL PRODUCTS WITH it.HIRE&RENTAL

NTT DATA Business Solutions

In the modern business landscape, having complete transparency over all rental services and products is crucial for optimizing profitability and giving customers what they want. Digital solutions hold the key to effective rental management.

Gain the Competitive Edge in the Hire and Rental Market

EQUIPMENT RENTAL IS BECOMING A GLOBAL TREND

Equipment rental is becoming an increasingly lucrative market. This means that there are many opportunities for businesses to create profit through renting out products and services. However, without an effective, scalable solution to manage rental agreements and products, leveraging the full potential of your equipment rental company is likely to be a challenge.

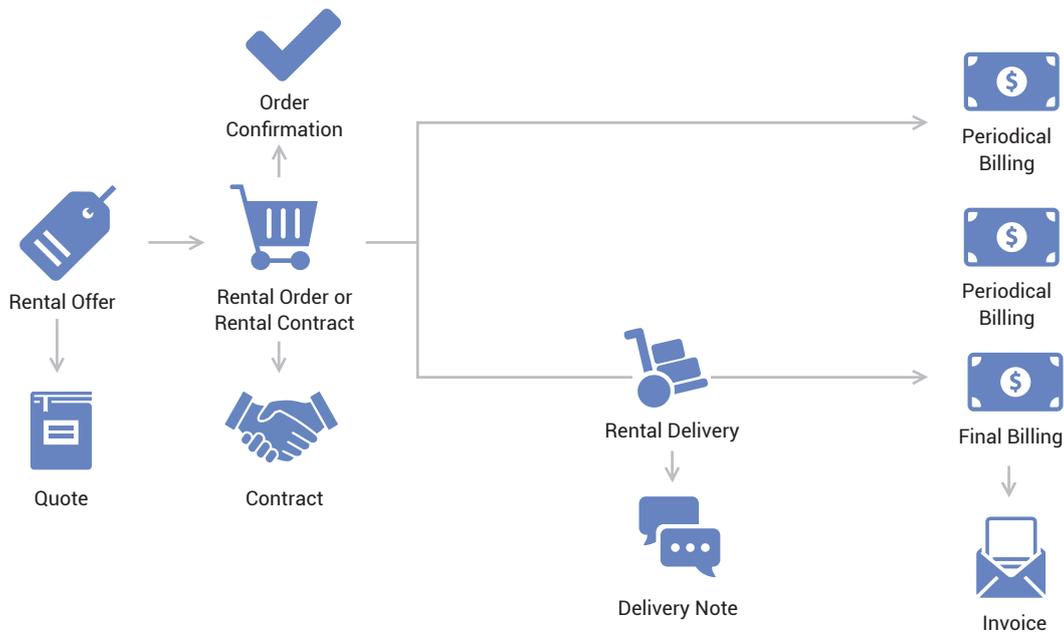

Is Your Business Facing These Challenges?

- Effectively dealing with and tracking a large number of rental processes and tasks
- Automating the tracking and billing of rental processes, some of which are in non-SAP systems
- Enabling transparency of the status of your equipment throughout the entire rental lifecycle
- Maintaining a balance between your portfolio on site and in the field, and your cash flow
- Maximizing the use of your inventory and being able to resell equipment at the end of its rental life
- Guaranteeing 100% equipment availability for your customers
- Planning ahead for spare parts and maintenance requirements

If you are struggling to achieve any of these objectives, it.hire&rental can provide you with the tools you need to take total control of the situation. The AddOn it.hire&rental from NTT DATA Business Solutions enables you to control and manage all rental processes effectively within your SAP landscape and can be tailored to suit the needs of your enterprise. So what features does it.hire&rental offer to help you optimize key rental processes, such as tracking and billing, at your organization?

The it.hire&rental AddOn from NTT DATA Business Solutions is a pre-configured, flexible module that can be easily integrated into your SAP environment. You gain transparency over all rental processes, from the first offer to all settlement types. In this way, you have all the information you need to make timely, informed decisions.

Fully Integrate All Rental Processes in SAP

Wholesale companies that offer rental products and services need a solution that streamlines the management of components, tools, and materials.

Key Benefits of the it.hire&rental AddOn:

- Easily maintain an overview of capacity utilization, price index, and availability
- Quickly integrate within SAP landscape thanks to pre-configuration and flexibility to adapt the AddOn to your business requirements
- Monitor all types of rental items, including serialized and non-serialized
- Report on key metrics from a single source
- Accelerate processing of rental agreements and orders

To support your digital transformation, you require **expert IT consultation** – NTT DATA Business Solutions has the expertise to guide you through this.

NTT DATA Business Solutions is the Perfect Partner for Rental Process Optimizations

NTT DATA Business Solutions is a global SAP Platinum Partner with more than 30 years' experience. We have 11,000 experts in 30 countries to support your rental business with its digital transformation. As a member of the NTT DATA group, we have the highest quality resources and support you whenever and wherever you need it.

Central Control for Ultimate Transparency

Decision makers are able to view all rental items by region and rental periods. Using the intuitive calendar display, you can view all rental items to determine availability of products and plan ahead. Billing data is also stored in this view. Additionally, you can report on this information for a clear and concise breakdown of rental agreements so that you are always informed.
