

OUR SAP BEST PRACTICE SOLUTION FOR MANUFACTURERS OF BLOOD PLASMA DERIVED MEDICINES

NTT DATA Business Solutions

Gain Visibility into Your Entire Plasma Supply Chain

FROM INDIVIDUAL DONATION TO FINISHED PRODUCTS

Simplify your plasma donation management process. Eliminate the complexity involved with working in separate, custom-built software systems. Avoid the time-consuming hassle of error-prone manual – and often duplicate – work.

it.lifesciences for plasma is our accelerator for the blood plasma processing industry. It ensures a single source of truth throughout all relevant end-to-end-processes, from individual donations to finished plasma derived medicines. The software enables one-click batch traceability reporting in highly regulated environments. And, it supports all aspects of GxP and computer system validation.

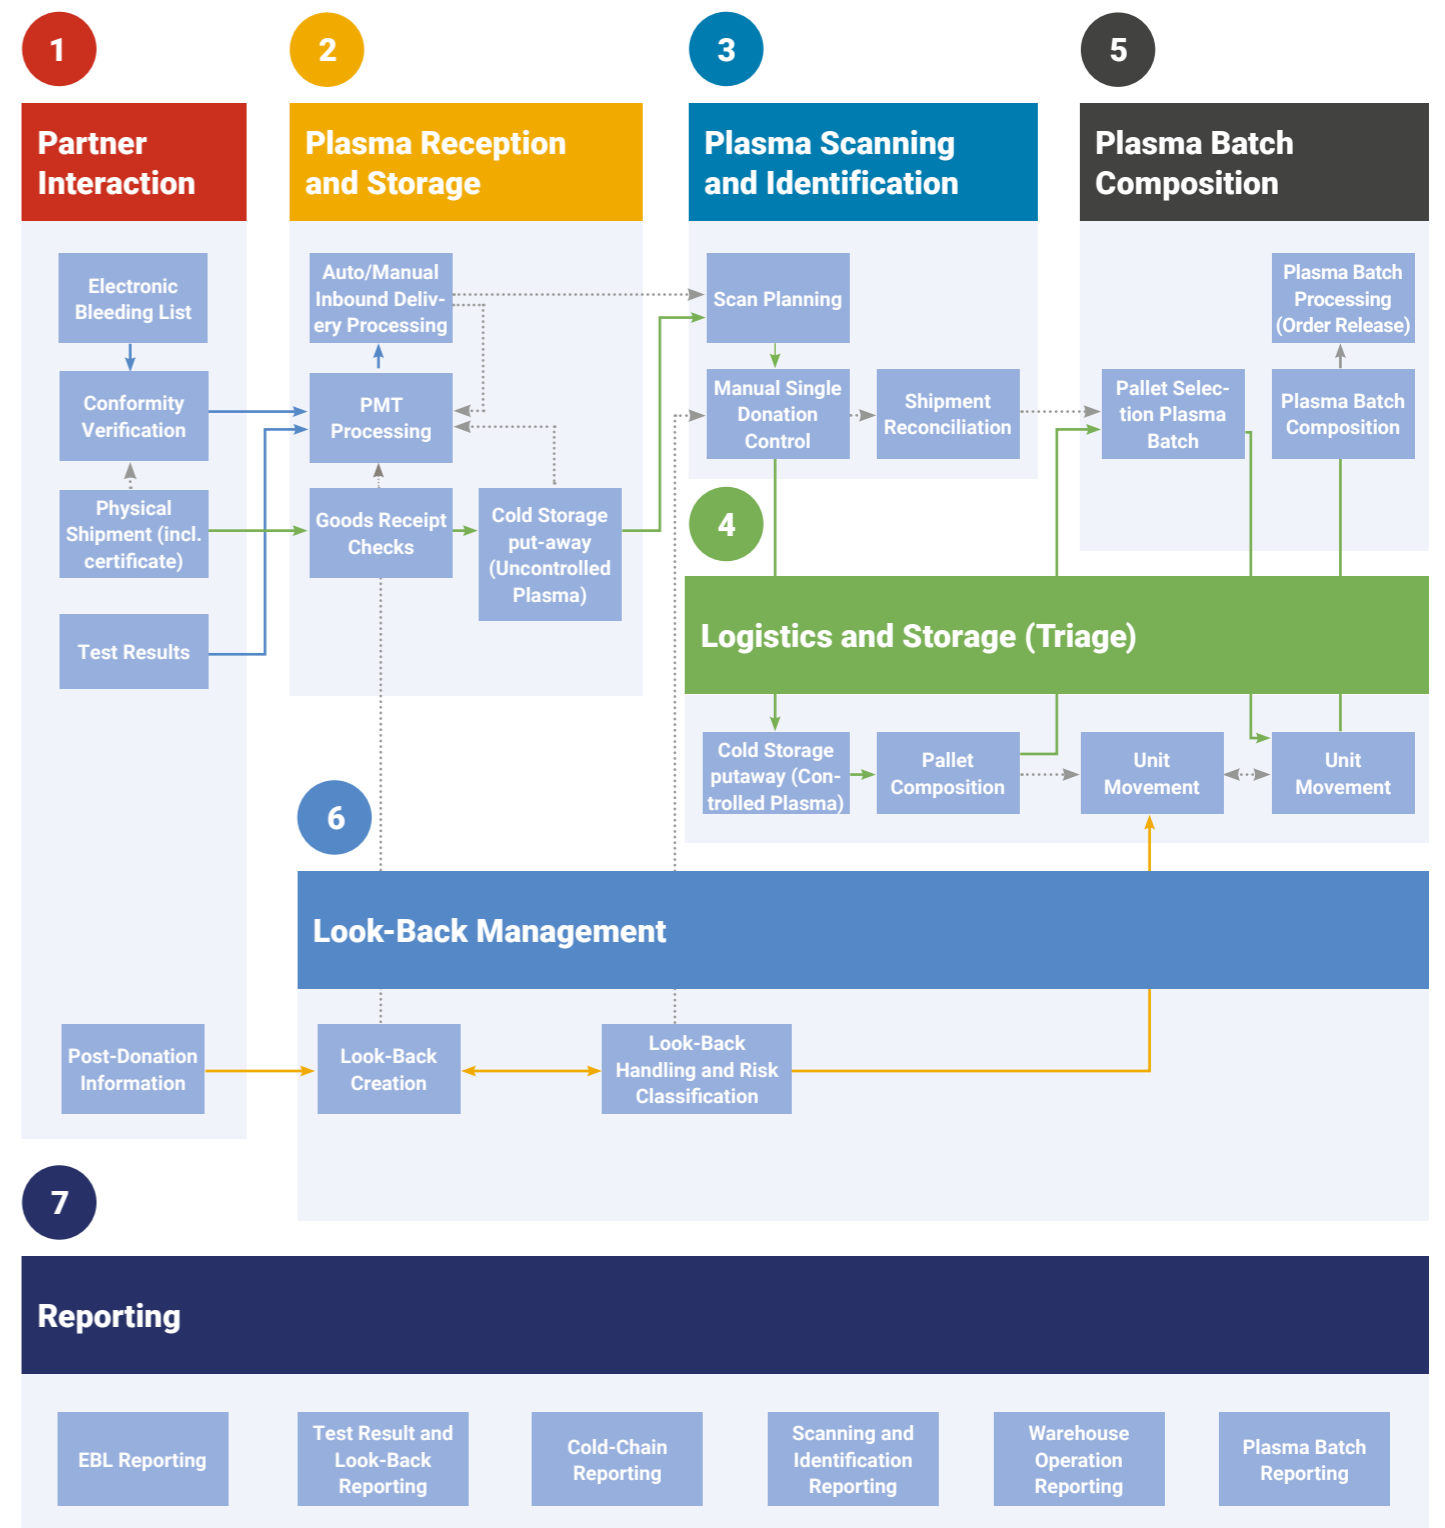

The Benefits of our Integrated Best Practices Solution

- One integrated single source application for plasma traceability reporting
- Supports the business model for plasma manufacturers and for Contract Manufacturing Organizations (CMO model)
- Runs on SAP ECC as well as on SAP S/4HANA
- Pre-storage un-controlled plasma: plasma shipment reception
- Identification & Weighing: plasma unit scanning
- Logistics & Storage: pallet composition, pick, pack and production staging
- Planning: pool building, pallet allocation worklist
- Production: production lot composition
- Look-back handling: end-to-end process integration, look-back status management, donor integration
- LIMS integration
- Reporting: extensive multi-angle look-back reporting, PMF, cold chain, stocks
- More than 300 processes supported by it.lifesciences for plasma
- WebPortal principles
- Electronic bleeding list upload & advanced shipping notification
- Real-time look-back announcements
- Supplier interaction with DMS for contracts, audits, checklists and more

1 mouse click to generate traceability reports all the way down to donation level

10 seconds to generate a lookback report

it.lifesciences for plasma solution features

Take control of your entire plasma supply chain with our integrated SAP industry solution that accelerates and smartens the production of blood plasma derived medicines. With our one-click batch traceability, you gain full transparency from individual donations to finished products.

NTT DATA Business Solutions: Your Validated Partner in the Blood Plasma Manufacturing Industry

We have been around for over 30 years, working side by side with companies in the human blood plasma manufacturing industry. We improve their business processes, while continuously maintaining end-to-end compliance with

increasingly strict rules and regulations. To cater to your every industry-specific need, we've tailored the SAP-based it.lifesciences software for plasma. It can be up and running in accordance with GxP in a short period of time and makes use of proven accelerators.

6-8
months to
implement
it.lifesciences
for plasma

In addition to having extensive experience in the life sciences industry, we are an experienced SAP recognized partner, highly skilled in validated software implementations, validated managed services, and validated managed cloud.

Traceability is key to assuring the quality of life-saving products. Speed is essential for bringing them to market in time.

We Transform. SAP® Solutions into Value

Digital transformation helps companies reach their full potential – if the underlying technologies work for the people using them! At NTT DATA Business Solutions, we design, implement, manage and continuously enhance SAP solutions to make them work for companies – and for their people.
