

Built for SAP ECC, S/4HANA

it.mx customer portal ^{ADD}

The it.mx customer portal^{ADD} provides a digital layer over existing data and processes in the form of web-based solutions.

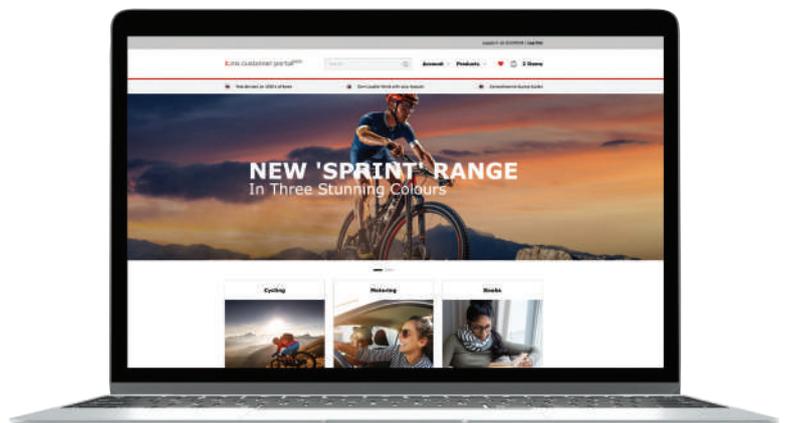

it.mx customer portal^{ADD}

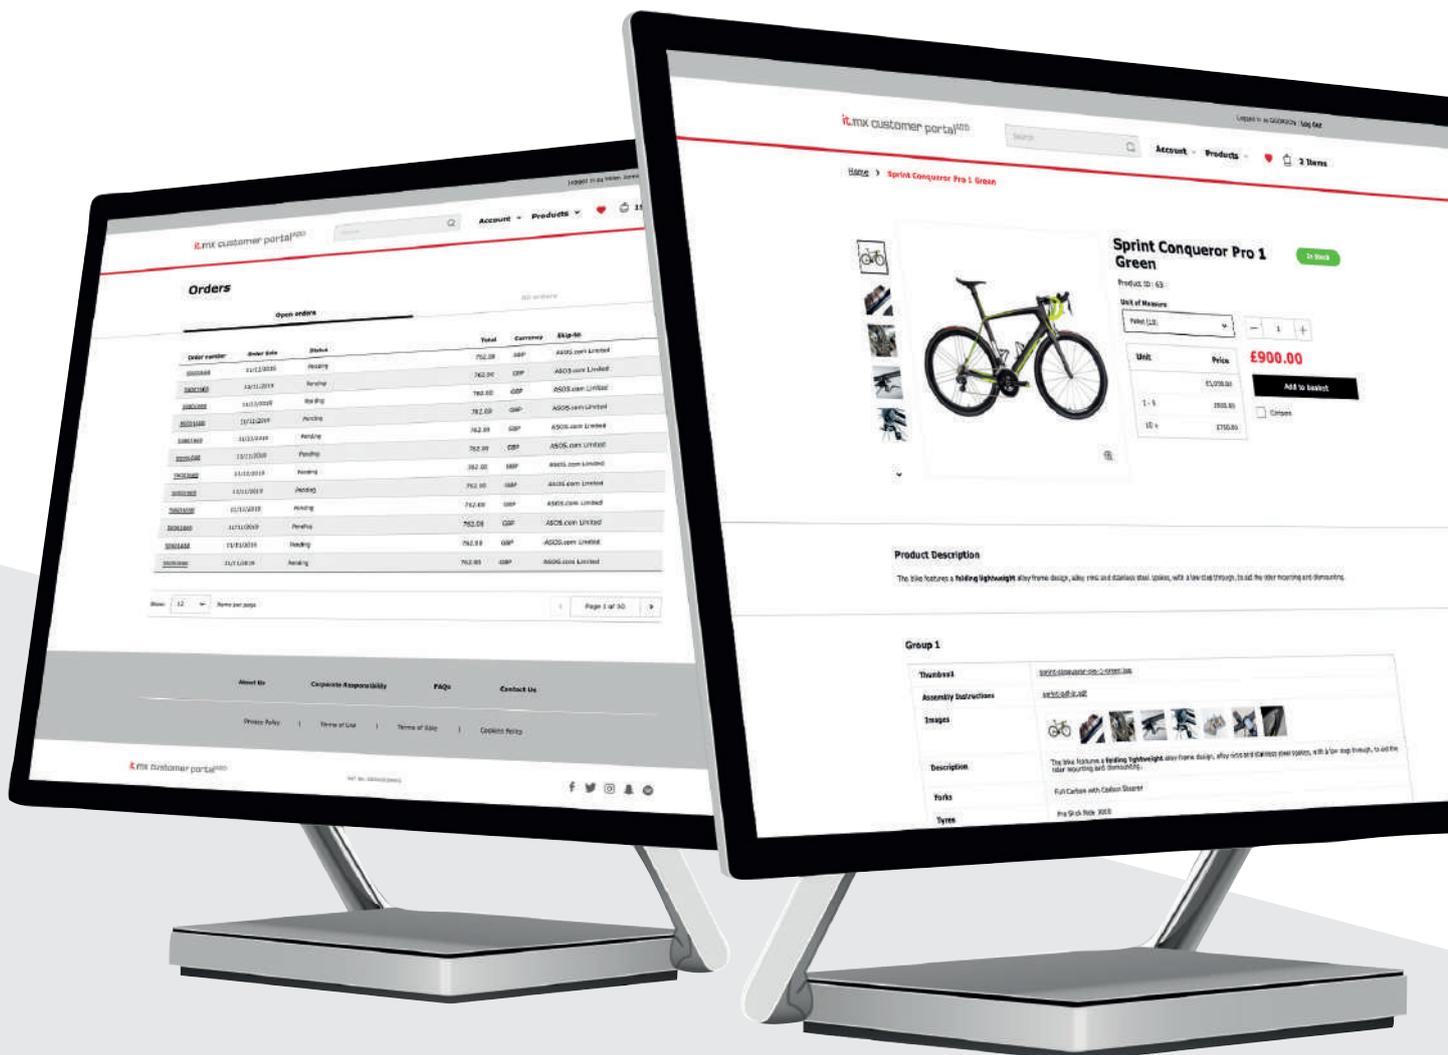

Securely extending the power of SAP to drive your online customer facing strategy.

The overwhelming desire of your customers to interact with you digitally cannot be denied.

Allow your customers to self-serve online whilst realising significant cost savings in areas like order processing and customer service as an associated benefit. The bar of customer expectancy has never been so high, so providing an online experience which is both modern and highly functional is no longer optional. The it.mx customer portal^{ADD} provides a multitude of features, allied with best practice user experience application to ensure you meet the needs of your customers.

It provides optimised user journeys and clear brand representation, whilst ensuring SAP remains the driving force in the background. Data such as customer specific pricing, financial details and stock information are utilised directly from SAP ERP, whilst processes such as online ordering mirror the processes for order creation already established in the back end to ensure all required elements are completed correctly by the customer. This also ensures that exceptions can be dealt with immediately rather than retrospectively, which would introduce unnecessary manual involvement.

The SAP centric way to deliver customer engagement:

- Simplified online ordering (including quick order facilities).
- Customer specific pricing.
- Multilingual capable.
- Stock availability.
- Access financial information.
- Account management.
- Create retained product lists.
- Product comparison.
- Related products.
- Quote creation.

As an SAP-centric extension, it.mx customer portal^{ADD} utilises the enterprise stability, scalability, security and capability SAP already provides.

it.mx customer portal^{ADD}

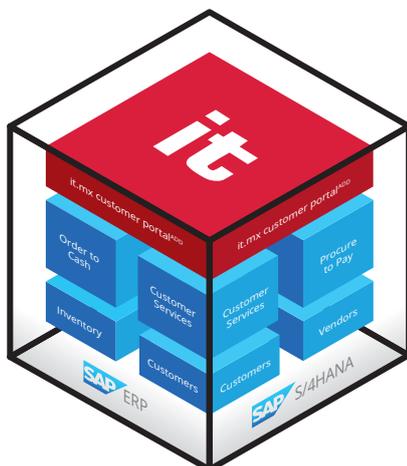

SAP certified customer engagement – sensibly delivered to minimise complexity.

SAP ERP and your customer facing online platform operating in harmony.

Typical eCommerce and digital engagement solutions for SAP have to be integrated with the SAP back end with the exception of it.mx customer portal^{ADD}. With core components delivered inside SAP ERP, it allows your customers to securely interact with your core business processes and real-time data as part of your customer engagement/

eCommerce strategies. As an SAP-centric extension, it utilises the enterprise stability, scalability, security and capability SAP already provides. The it.mx customer portal^{ADD} facilitates modern online customer engagement strategies with no significant impacts on infrastructure, headcount or landscape complexity.

- Real time information.
- Reduced risk.
- Reduced ongoing cost.
- Reduced support.
- Reduced complication.
