

Built for SAP ECC, S/4HANA

it.mx direct spend portal^{ADD}

it.mx direct spend portal^{ADD}

The SAP Certified portal which meets with IT approval by ensuring ongoing landscape simplicity.

The perfect choice for IT

The it.mx direct spend portal^{ADD} brings countless benefits to the supply chain of any SAP running organisation with functionality that delivers simplicity, increases efficiency and reduces cost. Whilst supply chain professionals appreciate what can be achieved by adopting this technology, it is important for IT that the solution does not add complexity and cost within their arena. The portal core components are uniquely delivered directly within SAP and utilise all the data and business processes you have residing in SAP. This removes the need for considerable duplication and integration whilst minimising the need for additional hardware.

Future-proofing the supply chain

By utilising UI5 technology, the it.mx direct spend portal^{ADD} offers an intuitive interface for easy adoption and provides the platform for rapid future development. As your SAP landscape evolves, the extension evolves with it, whilst simultaneously delivering the latest in efficiency driving features and functionality.

- Facilitates rapid development.
 - Future-proofed platform.
 - Increase ROI in SAP.
 - Intuitive interfaces.
-

Core components delivered directly within SAP utilising all the data and business processes you have residing in SAP.

it.mx direct spend portal^{ADD}

Delivering benefits for both your suppliers and your internal users.

Organisations are increasingly keen to utilise online platforms to drive efficiencies into their supply chain, whilst simultaneously improving collaboration with their suppliers. The it.mx direct spend portal^{ADD} comes with a comprehensive set of features to simplify the supply chain without adding complexity to the IT landscape. This is because the core product components are delivered inside SAP. The method of delivery ensures that the data being consumed, and business processes being

used are those already established in SAP, without the need for duplication or replication. The data in the extension is 100% accurate, in real-time and the data from suppliers (subject to your authorisation) is going directly into the correct location in SAP. Both suppliers and internal users are receiving an accurate, 360-degree view of the data from the extension.

it.mx direct spend portal^{ADD} should not just be for use by suppliers. Whilst the suppliers quickly adopt the portal as it simplifies their interactions with you, members of your purchasing team will do the same. They can also log in and reap the benefits of having numerous tasks they previously carried out

across multiple screens in SAP, located in a single UI5 based location. This drives efficiency, increases visibility and reduces the number of hours internal teams need to spend on administrative tasks.

The it.mx direct spend portal^{ADD} comes with a comprehensive set of features to simplify the supply chain, increase efficiency and reduce cost.

it.mx direct spend portal^{ADD}

Improving supplier collaboration, driving efficiency and reducing administrative costs.
