SAP BW/4HANA

STARTING YOUR BW/4HANA JOURNEY

What is BW/4HANA?

SAP BW/4HANA is the next generation SAP Business Warehouse powered by SAP HANA. This latest data warehouse software runs on the SAP HANA platform. It delivers new levels of simplicity for building and operating data warehouse solutions with flexible data management capabilities in a modernised user experience.

The solution has been designed from the ground up to simplify the provisioning of timely business insights. You can now capitalise on the full value of all data, and innovate with one trusted source for company-wide intelligence, that runs on SAP HANA.

It brings all of your SAP and external data together and makes it actionable. A data warehouse solution built on BW/4HANA can accelerate your business into real time, eliminating the barriers between operations and analysis and putting data in front of decision makers throughout your business.

We have a proven methodology that supports all phases of the BW/4 migration. Our specialists also cover affected areas like EPM, authorization and the SAP portal. Any repetitive tasks can be directed to our dedicated resources offshore.

SAP BW/4HANA is SAP's next generation data warehouse solution. It is a new product, built entirely on one of the most advanced in-memory platforms today - SAP HANA.

NTT DATA Business Solutions

How can NTT DATA Business Solutions Help?

NTT DATA Business Solutions has already a proven track record with many migrations from classic SAP BW to SAP BW/4HANA. itelligence Denmark has been in charge of one of the biggest migrations in the world. We have proven that our technical insight, estimation method and migration methodology will deliver a successful result. No matter the size of your current system.

We offer the below services to help you on your journey, and make sure you reach your goal.

BW/4HANA Assessment

- We will run a readiness check on your system identifying what obstacles need to be cleared before your can migrate to a BW/4HANA system
- Together we will determine the best path to BW/4HANA.
 We will deliver an estimate and a high-level project plan
- We can also assist you with any impact an S/4HANA migration will have on your BW system and BI strategy

BW/4HANA Clean-Up

- Every system is different, but almost all running systems contain a certain amount of waste. This could be: Not used data-flows, process chains, obsolete web-templates or just data that needs to be deleted. There is no point in migrating objects that are not used or paying for storage that is not needed
- We will identify the cleaning options and together with you remove what is not used

BW/4HANA Migration

- This is the full package. If not already done, we will start with an assessment. Once we have determined the best path for your migration to BW/4HANA, we will make a detailed project plan with the tasks and resource allocation
- Dependent on your wishes, we can make a fast, slow or flexible migration. We can lead the whole migration and supply the resources, or we can do a joint venture with a mixed set of resources
- We have a proven methodology and are able to split the migration into smaller work-packages which will be handled locally or shipped to our dedicated resources offshore
- We will migrate your system with minimal risk, minimal price and hardly any disturbance of the ongoing business
- We will train your resources in BW/4HANA so they are ready to use all the new benefits of future data warehousing
