More Reliable Financial Reporting via Immediate Data

With SAP S/4HANA, SAP SuccessFactors and SAP BPC solutions which gradually went live as part of the digital transformation process, common business processes of the group companies under the Holding were determined so that all processes could be managed from a single center. In the planning of the SAP S/4HANA project which went live in such a short time as one year, the goal was to enable faster action through the standardization of operational processes and reliable financial reports via immediate and accurate data. The entire system configured on SAP was customized for company-specific processes on the basis of Bakioğlu Holding's know-how and moved to ERP with improvements.

With this project, which was executed with the ASAP methodology, business processes at Bakioğlu Holding Packaging Group Companies were standardized and integrated. Processes are now being managed by the Holding using the Standardized Main Data and Reporting suite. Thanks to the integrations implemented, collaboration among departments was established. Through real-time and rapidly obtained reports, analytical capability was improved and costs were reduced.

The benefits provided by SAP S/4HANA and SAP SuccessFactors solutions such as user-friendly interface displays, integration capabilities, validity in the global arena, and configurability in a customized manner thanks to flexible structures played an important role in Bakioğlu Holding's choices for such a comprehensive transformation process.

Standardized and Integrated Human Resources Processes

Thanks to the SAP SuccessFactors solution, Bakioğlu Holding Human Resources was able to establish an integrated, jointly managed, and standardized structure for its executives and employees. With a total of 500 SuccessFactors users within the Holding, HR department and other employees adopted a self-service culture based on data-based management. All processes that were manually executed on Excel sheets before the transformation were fully standardized, enabling improved efficiency and reduced IT costs.

Bakioğlu Holding Governing Director for Corporate Resource and Solution Partners Fatih GÜLLÜKAYA said: "As an institution that adds value to our country by reaching for the 'best' in all areas of operation through continuous investment and development and is committed to contributing this success to the Turkish Packaging Industry in terms of global competition, the SAP digital transformation project we implemented under the consultancy of NTT Business Solutions has been a very significant step towards achieving our goals for the future. We are very happy to have embarked on this journey which is so important for us with NTT DATA Business Solutions, which is one of Turkey's largest SAP consultancy companies. As an innovation-inspired institution, we believe that our transformation journey and collaboration will continue brightly."

NTT DATA Business Turkey CEO Bahri Daniş said: "As a pioneer in digital transformation, we have been closely witnessing the transformative power of innovation in many occasions. We believe that the digital transformation project of Bakioğlu Holding, which has a very important position in Turkish packaging industry, will be a significant milestone for our country and inspire the shaping of new investments. In this respect, we are very happy to have helped them achieve improvements through the benefits we provided."
