

Smarter Universities

Provide Outstanding Student Experiences with it.education

 Competition is rising in higher education. But with integrated student lifecycle management, institutions can make a difference in the market and attract talented, digitally empowered students.

Support for the Entire Student Journey

it.education Boosts Student Success and Retention

Riding the Wave of Change

Competition is rising in higher education. Today's students are more demanding and have developed a consumerist ethos towards institutions of higher education. They want value for money, flexible learning, convenient access to information, and most of all, support throughout their journey. With many students turning to non-traditional methods of learning, such as massive open online courses and webinars, universities must adapt to the digitally empowered generation.

There are five key steps to ensuring the future success of any institution of higher learning:

- Support the entire student journey
- Adapt to non-traditional students and new ways of learning
- Leverage student and learning analytics
- Improve student retention and outcomes
- Embrace standardized solutions and best practices

97 of the 100 top universities in the world run SAP solutions.

elligence has developed it.education, a solution based on the SAP Student Lifecycle Management application and best practices in higher education. It covers all university processes – from application and enrolment to course management and graduation. The solution helps institutions to better understand students' needs and respond in a way that improves student performance, satisfaction, and retention.

It records a wealth of data, creating a comprehensive picture of students that goes beyond traditional student information systems. Moreover, it requires less time and effort to maintain, freeing up time for IT staff and university administration to innovate and support decision making.

Manage Your Data, Empower Your Students

it.education is geared towards driving student success and retention. Everyone within the organization profits from it – from students to faculty members, administration, and IT staff. Some key benefits at a glance:

- **Flexibility for students:** Students can evaluate their own progress, and book, change, or cancel modules easily. If they are considering taking a new direction, they receive guidance on the options available to them.
- **Real-time information:** Instant insights into student performance empower faculty, students, and administration.
- **Simplified application and admission:** Efficient management of admissions processes improves the whole application phase – from completing the online form to review and decision. Students can track their application status online.
- **Streamlined administration:** Fully integrated student information systems significantly simplify administrative tasks and maintenance. This enables improved student services, such as tailored study plans or personal learning support.
- **Self-service tools:** Students, administration, and faculty can quickly and easily review and update information at any time.
- **Full support:** The solution covers the entire student journey, from prospect to alumnus.

How it.education Makes the Difference

With it.education, institutions can:

- Create an individualized learning experience
- Use data to predict student progress and performance
- Act on up-to-date reports, insights, and information
- Plan modules and lectures efficiently
- Provide user-friendly interfaces for staff and students
- Offer mobile apps to give students anytime access to module information and exam results
- Intervene if students are at risk of failing or dropping out

 it.education gives institutions the tools to differentiate themselves quickly while maintaining flexibility.

Proven Time to Value

Pinpointed delivery of results in budget and on time through special implementation methodology and a template approach.

Integrated, yet Modular Solutions

it.education enables a consistent experience from recruitment to graduation – integrated, yet modular and adaptable by design.

Education Competence Center

A pool of experts from itelligence totally dedicated to the higher education sector.

Focus on Innovation

The it.education solution builds on the most innovative technology foundations by SAP – including SAP HANA, mobile, analytics, and cloud solutions.
