

Digitize Procurement in a Snap!

SAP Ariba Snap: Out-of-the-Box Procurement Software for SMEs

In increasingly competitive markets, cost pressure is rising – and SMEs are impacted more than anyone. Today, the profit lies in purchasing. But as SMEs face the same procurement complexity that larger enterprises do, they need a simpler way to manage their suppliers and control spend.

SAP Ariba Snap gives mid-sized and growing companies access to a global marketplace of over 2.5 million suppliers. The solution is ready to run, so you can make your first purchase on day one. It is also fast to deploy, enabling you to go live in 12 weeks or less. Here are five of the solution's top benefits for SMEs.

Optimized Procurement

Centralized management of procurement processes enables you to save time and minimize risk. SAP Ariba Snap eliminates paperwork and enables you to quickly find the right suppliers for whichever requirements you have. All information is automatically updated, accurate, and centralized.

Close Collaboration with Suppliers

Get instant access to a marketplace of proven suppliers in 190 countries and integrate them directly into your procurement process. Clarify specific order details with prospective suppliers, identify optimization potential, set individual performance targets, and prevent supply shortfalls.

Cost-Efficient Purchasing

SAP Ariba Snap gives you a single source of truth for all information on suppliers, spending, and agreements. As a result, you have the transparency to manage your spending much more efficiently, prevent unauthorized spending, and meet your cost targets with ease.

Effective Supplier Negotiations

With SAP Ariba Snap, you have access to the largest digital marketplace for contacting suppliers – and the ability to compare them side by side to find the best terms for your business. Transparent services and costs enable you to improve your negotiating position with suppliers.

Standardization, Transparency, and Control

SAP Ariba Snap automates numerous steps in the procure-to-pay process, including daily purchase requisitions and discount monitoring. You have full transparency over individual supplier performance and make savings across all spend categories.
