Asia's Biggest Fertilizer Manufacture, Distributor, & Service of Fertilizer

PT Pupuk Indonesia (Persero) is one of the largest fertilizer producers in Asia. The group consist of fertilizer and pesticides company, chemical products company, industrial support, and logistic and trades company and they own the production capacity of 22 million tons per year which consist of 14 million tons of fertilizers per year, and 8.6 million tons of ammonia and other products. They have worked with NTT DATA Business Solutions Indonesia as their trusted partner for others SBU since 2018.

Streamline Business Process

Seeing that the maintenance system in terms of planning and execution is still combined into one, the Pupuk Indonesia Group feels that it needs improvisation to be able to improve and streamline existing business processes.

"Looking at best practices in the world to increase reliability we need good management and maintenance one way is to separate planning and execution."

Realizing this and to develop and streamline business processes, we need to implement SAP. SAP itself has been implemented in the business transaction process in Pupuk Indonesia Group, so the new SBU also needs to implement SAP with the main objective of efficiency in Pupuk Indonesia Group's business processes.

Long-term Relationship of Trust Since 2018

Pupuk Indonesia Group has collaborated with NTT DATA Business Solutions Indonesia in other strategic business units for business transaction processes. For this reason, when there are other needs related to SAP, of course in the process of selecting partners, the team from NTT DATA Business Solutions is included in the limited invitation list.

Regarding the evaluation and recommendations of the team, NTT DATA Business Solutions Indonesia was re-elected to work with Pupuk Indonesia Group.

The successful collaboration between NTT DATA Business Solutions and Pupuk Indonesia Group is inseparable from these factors including management support, good teamwork and collaboration, intensive client involvement, and shared goals, priorities and commitment.

NTT DATA Business Solutions is honored to continue to work with The Pupuk Indonesia Company as we continue to work towards new successes.
